Under Sink Filtration

SAFER Water Right Out Of The Kitchen Faucet

Chlorine & Cyst Reduction

Best performing Point of Use (POU) cartridge system. Connects directly to the faucet for easy installation. Saves time and money. Unlike standard Reverse Osmosis, the Titanium Drinking Water System does not waste water. Some R/O units use as much as 3-5 gallons to make just 1 gallon of drinking water!

Coconut Shell Activated Catalytic Carbon Block Filter

Reduces contaminants such as sand, silt, turbidity (dirt), and organic particulates that may be present in municipal water. High-quality coconut shell-activated carbon block reduces 99.95% of chemical contaminants (including chlorine) that harm plumbing and make drinking water smell and taste bad.

Sub-Micron (0.2) Filter

Reduces 99.95% of microbial cyst (such as cryptosporidium, toxoplasma, giardia and entamoeba) that may be resistant to public water disinfection and could cause health issues.

Connects To Kitchen Faucet

Eliminates the need for a separate glass filling faucet. 3.0 GPM flow rate.

NSF Capacity Certified

Certified by nsf.org for chemical reduction for up to 55,000 gallons. Designed for municipal water use only.*

Does Not Waste Water

Does Not Use Electricity

Mounts Under Your Sink

100% Recyclable

**Under normal water conditions.
For use on municipal water only.
This system is not recommended
for wells.*

**Most Effective For Chlorine
And Cyst Reduction**

Replacement Filter

Titanium 112238 | Case of 4

Tested and Certified by NSF International against NSF/ANSI Standard 42 and 53 for the reduction of Cyst, Chlorine, Taste and Odor. Visit: www.nsf.org/certified-products-systems
