A Better Solution For Hard Water

Pinhole Leak Protection For Your Expensive Plumbing System

A staggering 85% of the U.S. has hard water. Hard water is high in mineral content largely made up of calcium, magnesium carbonates, bicarbonates and sulfates. These minerals when exposed to air can scale and corrode pipes, faucets, fixtures and water-using appliances.

10 Micron Filter

Reduces larger particulates, contaminants to protect the carbon cartridges. Capacity is 150,000 gallons. Consider replacing every 6-12 months.*

Polyphosphates - A Hard Water Solution

Food-grade, FDA-approved polyphosphates treats and sequesters hard water minerals and protects plumbing from limescale formation and corrosion.

NSF Capacity Certification

Certified by nsf.org for physical reduction for up to 150,000 gallons. Designed for municipal water use only.*

Most Effective For Physical Contaminants and a Hard Water Solution

-  Does Not Waste Water
-  Does Not Use Electricity
-  Mounts on the wall, saves space
-  No Head Programming
-  100% Recyclable

**Under normal water conditions. For use on municipal water only. This system is not recommended for wells. Polyphosphates are recommended for water up to 20 grains per gallon of hardness.*

Replacement Filter
Bronze 112212 | Case of 4

NSF

Tested and Certified by NSF International against NSF/ANSI Standard 61 for material and structural safety.
