

SILVER PLUS HC

HWF - 4925PHC

Sediment, Chlorine Reduction

Plus Hard Water Solution

SPECIFICATIONS

Capacity:	265,000 Gallons
Flow Rate:	7.5 GPM
Micron Rating:	5.0 Micron
Operating Pressure:	20-80 PSI
Operating Temperature:	35°-130° F

Scan For
Owner's Manual

Flow rate and filter capacity refer to the individual filter only. For systems containing multiple filters, refer to the system installation manual for specifications.
Replace the cartridge every 36 months to ensure proper filter performance and continued reduction of line and scale build up. The cartridge capacity may vary according to flow rate, inlet line pressure and local water conditions, which may require more frequent cartridge replacement.
Check for compliance with state and local laws and regulations. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. The performance or resistance reduced by this filter are not necessarily in your water. For additional product information, please visit www.honestwaterfilter.com.

To be serviced by an authorized licensed plumbing professional only.

BECAUSE YOU MATTER™

AQUAMOR

Tested and Certified by NSF International against NSF/ANSI Standard 42 for the reduction of chlorine taste and odor.
