

Superior Water For Your Family & Home

Filtered water is more necessary than ever with today's municipal water quality. Bottled water is expensive, and not environmentally friendly. It also doesn't address bathing, cooking and cleaning. Bottled water also does not protect your plumbing.

THERE IS A BETTER SOLUTION

The Honest Water Filter Company is proud to introduce the "*Ultra-Filter*" whole home water filtration, a patented design by Aquamor Water Technologies.

- Sub-micron 0.015 filters out turbidity at 8-30 gpm
- 99.99% four log reduction of bacteria, viruses and cyst
- Very low operating cost and flexible programming to handle virtually any water source, including wells
- Self-cleaning cycles ensures the cleanest water
- Complete design ready to install
- Optional scale control available
- NSF certified components

Add Honest Water Filters after the ultra-filter to reduce chloramines and/or chlorine taste and odor causing chemicals added by municipal water districts. Time to get some of the best water possible from every faucet and shower head in your home.

POST FILTER CERTIFICATION

HWF Series of filters are Tested and Certified by NSF International against NSF/ANSI Standards 42 and/or 53 for the reduction of cyst, chloramines and/or chlorine taste and odor. Refer to our website and Performance Data Sheet for complete list of claims.
