

ECO ELITE PB

The Eco Elite PB Whole House Water Sediment Filtration System is designed to protect your home's plumbing and appliances by effectively filtering out sediment and reducing scale buildup. With a durable housing and high-performance filtration, it ensures cleaner, clearer water throughout your household. Easy to install and maintain, this system helps extend the lifespan of your appliances while improving overall water quality.

Features:

- **Advanced Filtration:** 5-micron sediment-scale cartridge removes particles and reduces scale buildup.
- **Durable Housing:** 4.5" x 20" DP Big Blue Housing
- **Performance Monitoring:** Two pressure gauges to track system efficiency.
- **Hassle-Free Maintenance:** Drain kit included for easy filter changes.

Ideal for homeowners seeking dependable, whole-house filtration, the Eco Elite PB system delivers protection and peace of mind.

KEY FEATURES

- **1" NPT Inlet and Outlet:** Easily integrates into most plumbing setups
- **Flow Rate:** Up to 20 Gallons Per Minute
- **Pressure & Temperature:** 120 PSI of pressure and up to 113° of temperature
- **Longevity:** Filters last up to 12 months under normal municipal water conditions
