

ECO WELL APPLICATION

Wells naturally present their own individual challenges. To meet those challenges, we now offer our Eco Family Backwashing Specialty Filters that tackle some of the most difficult water conditions. Well water chemistry can frequently change, because of various weather conditions like heavy rainfall. Thanks to the backwashing functionality, these specialty filters can clean themselves of numerous bacteria, cysts, and other contaminants that may exist in the water.

ARSENIC FILTER

**HYDRA PRE-FILTER FOR
IRON
MANGANESE
HYDROGEN SULFIDE**

Hydra Pre-Filter key features include:

- **Single & Multi-Stage Filters:** Self-cleaning filters with innovative solutions for efficiency.
- **Newly Designed:** Backwash system in the counter-current, which enables the highest particle removal from the filter cartridge.
- **Convenient Maintenance:** Includes a drain kit for easy filter changes.
- **Complete Installation Kit:** Comes with bracket and a wrench for secure fitting.

Arsenic Filter key features include:

- **Durable Construction:** 10" x 54" steel tank.
- **Easy Programming:** Simple valve programming for complete control of backwashing cycles.
- **Metered Filtration:** 1" MPT Metered Filter at 10 gallons per minute.
- **Arsenic Reduction:** 1.5 cubic feet of Metsorb carbon media.

NSF/ANSI Test and Approved
IAPMO Certification
