

TREAT

3 Concerns In Municipal Water

There are 3 concerns in municipal water that must be addressed by a filtration system.

1. Physical Contaminants
2. Chemical Contaminants
3. Hard Water Minerals

Each of these concerns affect you and your family's health, the health of your plumbing system, and all the water-using appliances in the home.

The Eco line delivers trusted water filtration in one system at a lower upfront cost and without wasting water.

Ask your plumbing professional about the benefits of the Eco Line by The Honest Water Filter Company.

Designed for whole-house applications to provide cleaner, clearer drinking water, and protect pipes, appliances, and fixtures.

These point-of-entry (POE) units are designed to reduce sediment, color, taste, and odor in whole house applications. Add optional Scale Guard media for protection against lime scale build up in plumbing, fixtures and appliances. Specialty filters and backwashing well applications available with Honest Water Filter Company consultation.
