

3 Elements Of Municipal Water

For the last 60 years, the choice for water treatment was a large stand-up tank with loose granulated carbon. While these tanks may be effective for treating taste and odor, they only addressed one of the three elements in municipal water...chemicals.

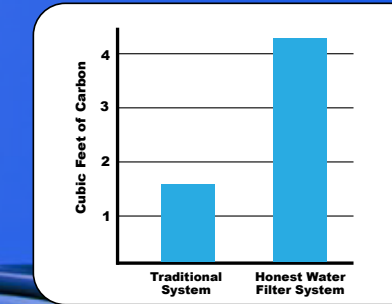

1 System Treats All Three

What Contaminants Can Your Filter Remove?

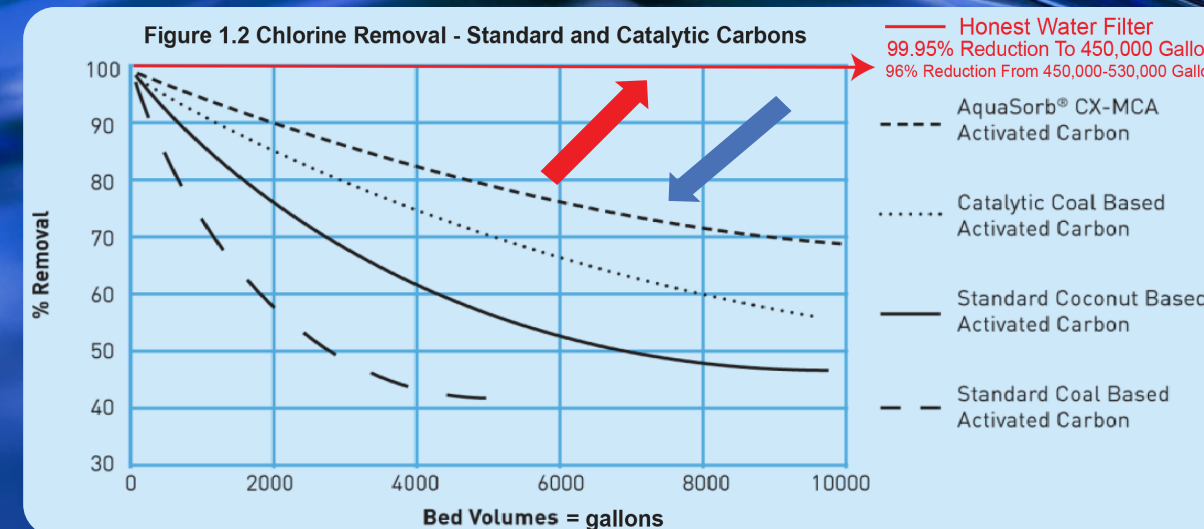

The Honest Water Filters are the best way to ensure you and your family are drinking, cooking, bathing and cleaning in safer, healthier water. Our water filters can filter down to 0.015 microns, thus reducing 99.95% of bacteria, viruses, cyst and a host of other contaminants! Why not get the BEST whole house system available today?

Skeptical? We get that. Check out the charts below that illustrate the difference between traditional stand-up tank systems vs. Honest Water Filter systems

We start with more than twice the activated carbon!

Loose granulated carbon falls off in effectiveness almost immediately!
