Better Drinking Water For Your Family

High Quality Coconut Shell Catalytic Carbon Filter Reduces Organics, Chlorine, **Chloramines and Particulates in Drinking Water**

Unlike standard Reverse Osmosis Systems, the Titanium Drinking Water System does not waste any water. Some R/O units use as much as 10 gallons to make just 1 gallon of drinking water!

The compact cartridge connects directly to your kitchen faucet and reduces particulates, chlorine and chloramines that make water smell and taste bad.

The Carbon Block Filter (0.2 Microns) reduces harmful bacteria and microbial cyst like Entamoeba Toxoplasma, Giardia and Cryptosporidium that exist in today's public water supplies. These bacteria and cyst are also becoming increasingly resistant to public water disinfection and could cause health issues.

Make a smarter, healthier choice with your drinking water and save hundreds of gallons of water every year.

**Does Not Waste Water
Does Not Use Electricity
Mounts Under Your Sink
100% Recyclable**

The Honest Water Filter is the best way to ensure you and your family are drinking and cooking with cleaner, healthier water.

Tested and Certified by NSF International against NSF/ANSI Standard 42 and 53 for the reduction of Cyst, Chloramines, Chlorine taste and odor. Visit: www.nsf.org/certified-products-systems
